## Boötes Void

At the start of 2019 Boötes Void was born as side project of some musicians from Würzburg in Germany. But soon they realized, that they should give this project more attention. After some ideas that were worked out and some line-up changes, the concept and line-up were quickly determined. The songwriting was in full steam and the first thoughts about how and where the recordings could take place, where already being made. The first concert took place, directly afterwards the band went to the Soundbath Studios in Rothenburg to make the first recordings. And while they were looking for the possibilities to release the first EP, the next live shows took place at the Saartanica Festival and the Minas Morgul & Ctulu. 2020 started with the release of the first record on Winterwolf Tonschmiede and Narbentage Productions. With this on board some more live Rites followed to enslave the crowd into the occult ban of Boötes Void. The first album (C.O.L.D.) followed in early 2022 and was released via Ketzter Records. Let yourself be inspired and carried away into the world of Boötes Void when the occult rite wraps the stage in its atmosphere. In 2023 Boötes Void has already started with the first performances and a new album is already in the pipeline, which will surely open many doors again.

## Saturnists

????? pronounced "saturnists"

we took our way unto the nearest Woods seating ourselves within a darksome cave such places heavy saturnists do crave where yet the gladsome day has never seen nor phoebus' piercing beams had ever been.

## Baalstone

Baalstone is fuelled by heathen rituals, environmental crisis and the bliss of distorted guitars. By combining heavy riffage, sinister melodies and musical harmonies, Baalstone is grounded in environmental protection and relentless expression of all facets of life.
