Iron Walrus

An adult walrus can weigh more than 2,000 kilograms. Many human beings must feel similar emotional weight on their shoulders in this day & age - solid as iron and heavy as a walrus. IRON WALRUS perfectly capture these feelings in tunes that are ranging somewhere in between stoner, sludge and metal with a healthy portion of doom and noisecore. Their three albums so far showcase their ability to provide slow-paced, catchy mid-tempo riffs, wich doom appearance is supported by powerful drums and relentlessly deep vocals. This gives their songs a lot of depth as well as a crushing brutality. But IRON WALRUS don’t just roll slowly over the listener, they also know when to press the tempo pedal down in spot-on doses, without ever losing their enormous groove. The German band from Osnabrück (Lower Saxony) is a strong live force, that has crushed stages during their tours with EYEHATEGOD (2023), COVEN (2022), KHEMMIS (2019), ROOTS (Max & Igorr Cavaleira/2018) and CROWBAR (2015/2016) and during their shows in support of HATEBREED, PENTAGRAM, MANTAR, ST.VITUS, TORCHE, SODOM, OBITUARY (and many more), as well as during their festival appearances at the „Rockavaria Festival“(Munich/Olympia Stadium/w/SLAYER, GHOST & IRON MAIDEN), the „Desertfest London“, „Stoned From The Underground“ (twice) and two times on europeans biggest Doom-Festival „Hammer Of Doom“ (2019 & 2022). Fans and press relatives were likewise impressed and spread the word to an ever-growing fanbase. The German ROCK HARD magazine cited „IRON WALRUS are the kings of choruses“ while DEAF FOREVER described the five-piece as „Apocalyptic border crossers between doom, sludge and metal“. Now it’s time for IRON WALRUS to present their new album „Tales Never Told“. For this release, they teamed up with APOSTASY RECORDS (Crisix, Night In Gales, Nailed To Obscurity etc.) to make sure that

these tales don't stay untold. A new musical heavy weight is about to see the light of day.
