Radar Men from the Moon

Radar Men From The Moon (RMFTM) is an experimental collective from Eindhoven (NL). Nothing is fixed and everything is in a constant state of flux, never standing still. Their upcoming album 'Vomitorium' is slated for release on Fuzz Club Records, August 16th. Heavier and darker than before; reveling in cathartic excess and a bludgeoning intensity, they power through 90s industrial electronics, discordant noise-rock and the darkest post-punk extremes. After nine albums and shows throughout Europe, RMFTM are ready for their next chapter.
